ex. 1
it will output each answer one after another:
2
1
2
null
1
undefined
3

ex. 2

```
if (14<=age<=90){
 console.log("age is between 14 and 90!");
};
```

ex. 3
```
if (14<=!age || age<=!90){
console.log("age is NOT between 14 and 90");
}   else {console.log("error")};
```

```
if (14>=age || 90<=age){
 console.log("age is NOT between 14 and 90");
} else {
   console.log("error");
};
```

ex. 4
Alert "first" and "third" will execute.

ex. 5
```
        let name = prompt("Login")

        if (name == "Admin"){

        } else if (name == "" || name == null){
           alert("Cancelled!");
           exit();
        } else {;
           alert("I dont know you");
           exit();
        };

     let pass = prompt("Password");
        if (pass == "TheMaster") {
           alert("Welcome!");
        } else if (pass == "" || pass == null){
           alert("Cancelled!");
        } else{
           alert("Wrong password!")
        };
```
